COMMUNITY PARAMEDICINE FORUM – BREAKOUT SESSION #2

# HOW DO YOU DEMONSTRATE SUCCESS?

Discussions on measurement & evaluation.

Secretariat Mandate:

- Advisor on implementation & evaluation
- Standardize processes, measurement, and reporting
- Build capacity & promote quality improvement
- Build partnerships to inform integration

CSA Standard Z1630-17: Framework for CP Program Development

The discussion questions are intended to be applicable to all forms of CP program design.

Guidelines

- All Community Paramedicine programs involve aspects of patient care, coordination with health system partners, and responsiveness to changes in patient condition.

- Documenting information pertaining to these aspects should be part of program design.

- In your discussion groups, please focus on "current state" practices—not ideals or "future state."

Begin with introductions!

- **SIT WITH DIFFERENT PEOPLE THAN WHO YOU SAT WITH YESTERDAY!**
- Take a few minutes to introduce yourself to the rest of your group to make sure everyone knows each other.
- In the process, provide a very brief description of the CP program(s) you are involved with to provide context to the discussions you are about to have.

Instructions

- Each table has a handout with questions on one of the following evaluation or reporting areas:
  - Baseline Information
  - Program Aims & Benchmarks
  - Key Measurements
  - Patient Safety & Quality Assurance
  - System Integration
- Have one group member be the scribe for your table and record discussion points on the provided handout.
- Facilitators will circulate through the room if you need any clarification.
